Foyer & security arch: With the Fine Outfit and a name from Ines you get waved through. Sprawl Whisperer gives the crew +1d on the engagement roll if you did your research.

Gallery & conservatory: Dr. Venn only talks to people who take art seriously. Consort 2 and Study 1 are enough to ask for a private viewing. The Privacy Generator buys five undisturbed minutes.

RIVAL

Tobias Wren, society reporter. Writes for a trid gossip channel, knows every face on the scene and once covered Mercer’s fall with relish. He is invited tonight.

WHY YOU TAKE THIS JOB

You used to be inside: the invitations, the receptions, the right people. A scandal you did not cause threw you out. Six nuyen is good money, but the real payoff is one evening standing at the top again. And maybe the name behind it all.

SINs, elves and the price of existing. A SIN (System Identification Number) is more than an ID in the Sixth World: bank account, apartment, health insurance, the right to vote. Lose it and you officially stop existing. Mercer comes from Tír Tairngire, the elven nation south of Seattle, where bloodline decides careers. That Mercer now works with ork punks counts as a disgrace in the family.

Detective Marisol Ruiz, contracted police service. Missed Chameleon by a hair two years ago and has collected every recording of a person who never shows up twice since.

WHY YOU TAKE THIS JOB

The bookies want their money and you have skipped town too often already. But honestly: a gala, a vault, a curator with a cybereye and a case nobody may open. It is the best role you have been offered in years.

Trideo, simsense and identities for sale. Trid is the television of the Sixth World: three-dimensional, everywhere, with stars more powerful than senators. Simsense goes further and plays feelings and senses straight into the brain. Anyone who was famous in this world knows how cheap identity is: on the black market a SIN costs less than a good dinner, but it only holds as long as nobody looks closely.

RIVAL

Nullpunkt, Matrix competition. Sells the same exploits to the same people, just an hour earlier. Claims Kessel's cyberdeck is “a toaster with ambitions”.

WHY YOU TAKE THIS JOB

The clinic in Puyallup keeps sending reminders. Six nuyen clears the rest. And Glitch said something that will not let you go: “Level 110 has its own host. Nobody builds that for art.”

The Matrix. The Matrix is everywhere: as augmented reality over the street, as virtual reality when you plug in via trodes or datajack. Corporations run hosts; their security hackers are called spiders. Break in and you risk biofeedback that injures the body. Deckers like Kessel build their tools from scrap because a legal cyberdeck costs more than an apartment in Bellevue.

WHY YOU TAKE THIS JOB

You want your old reconnaissance drone back; a scrap dealer in Tacoma holds it for twelve nuyen. Six is a start. And this run has altitude, wind and a tower that deserves a proper approach.

Riggers, drones and corporate wars. A control rig links the nervous system directly to machines: whoever rigs feels the rotor like their own hand. Such implants cost Essence, a piece of humanity that cannot be bought back. The Desert Wars are the televised wars of the corporations, mercenaries fighting in front of cameras. Anyone who flew there knows the difference between a target and a person.

magic in the body, perfection as a path

Moves where sensors stand and senses danger before it arrives. Reads people like a pulse. Solves conflicts with a grip instead of a bullet.
MENSCH · FEUERPROBE · RUNNERS IN THE SHADOWS

SPECIAL ABILITIES

Practitioner of the Way REQUIRED
Way of the Body (Fight, Finesse, Prowl, Wreck): three of your starting dots lie there. You resist supernatural consequences with Body. You can never become Awakened or Emergent. Choose an adept drawback from the rulebook.
Adept Senses START
Spend 1 edge to perceive beyond normal limits for several minutes. Detect subtle environmental changes (temperature, frequency, pressure), sense the presence of danger, become a living lie detector.

GEAR · BOX = PACKED · • RECOMMENDED

- ☐ **0 Fine Mystic Body Art** • Tattoos that focus your adept core.
- ☐ **0 Strange Trinket** • A small item, here a worn prayer chain, that shows visions of the past or near...
- ☐ **2 Fine Astral Weapon** A short staff effective against astral beings.
- ☐ **1 A Quiet Weapon** • Standard: throwing knives or a blowgun with tranquilizer darts.
- ☐ **2 Climbing Gear** Standard: grappling hooks and carabiners in case Prowl 2 is not enough for once.

Standard anytime: Comm 0 · Armor 2 · Pistol 1 · Burglary Gear 1 · Climbing Gear 2 · Subterfuge Supplies 1 · Quiet Weapon 1 · Medieval Weapon 1 · Technical Tools 1 · Demolition Tools 2 · Lighting Gear 1 · Ammo 1

HOW YOU SHINE IN THE MERIDIAN SPIRE

- Sensor corridor 110:** Adept Senses feel light barriers as warmth, pressure plates as unevenness, cameras as a hum. Prowl 2 carries you through.
- Dr. Venn:** As a living lie detector you notice her turning suspicious before she shows it. Study to read her; Finesse to capture the iris scan unnoticed.
- Conservatory glass roof:** The vent flap sticks mechanically, no sensor. Five meters of rope into soft plants is a step for you.

FRIEND

Master Oyelaran, dojo owner in Georgetown. Trains half of Seattle's security industry. He knows which guards stand in the Spire tonight, which of them are augmented and who gets careless after a 14-hour day.

RIVAL

Aurel Voss, adept in the service of a corporate security firm. Once trained beside Hush and considers this path a weakness. He advises security companies in Bellevue, occasionally Vesperline too.

WHY YOU TAKE THIS JOB

You seek tasks that make you grow. A tower full of sensors, drones and a curator who must not be harmed is a test of your discipline. The money goes to the dojo. The test is yours.

The Awakening and the adepts. Magic has been back in the world since 2011. About one in a hundred people is Awakened: mages cast and summon, adepts channel mana into their own bodies and become faster, more alert, harder, without anyone seeing it. Cyberware and magic do not mix: every implant costs Essence and weakens the gift. Adepts like Hush therefore choose the body they have and make it the weapon.

Mage

Awakened, hermetic, a view into astral space

Sees what nobody else sees: barriers, watchers, magical auras, the case among a hundred objects. Casts quietly and knows how corporate mages think.

ORK · FEUERPROBE · RUNNERS IN THE SHADOWS

SPECIAL ABILITIES

Awakened REQUIRED

Arcane method: hermetic tradition (choose drawbacks per the rulebook). You may roll the Assense action; when you roll a desperate Assense action, mark 1 karma on the Willpower track. Buy further Assense dots as a Willpower advance. Never Emergent or an adept.

Sorcerer START

You know the unique methods to activate metaplanar energies through your body to cast spells. You can Study a spell formula to summon a supernatural effect. You begin with two spells already learned.

GEAR · BOX = PACKED · • RECOMMENDED

1 Fine Spell Focus • The ring of meteoric iron: wield spells with exceptional control.

1 Fine Sensing Focus • Glasses through which you see arcane energies in great detail.

0 Banishing Focus • A small arcane amulet that astral beings prefer to avoid.

1 Fine Arcane Reagents Grave dust, prayer beads, awakened feathers: concentrated essence for big...

0 A Paracritter An awakened animal as a companion (cohort, expert).

Standard anytime: Comm 0 · Armor 2 · Pistol 1 · Burglary Gear 1 · Climbing Gear 2 · Subterfuge Supplies 1 · Quiet Weapon 1 · Medieval Weapon 1 · Technical Tools 1 · Demolition Tools 2 · Lighting Gear 1 · Ammo 1

HOW YOU SHINE IN THE MERIDIAN SPIRE

- Vault 110:** Assense shows you the dual mana barrier, the living tissue and the watcher on its rounds. At the doorway you see how the barrier is opened in a controlled way: an advantage for any way in of your own.
- The collection:** The case carries a faint, old aura. Among a hundred glittering things it is the only one that whispers to you. You also see which antiques are magical and which are merely expensive.
- Stunbolt & Veil:** A guard sleeps, a runner looks like staff, the case looks like a briefcase. Non-lethal, silent, exactly as Johnson demanded.

FRIEND

Talia Vance, talismonger in Tacoma. Deals in foci and reagents and hears everything Seattle's Awakened gossip about. She has heard that the barrier in the Meridian Spire was drawn by a master nobody knows.

RIVAL

Dr. Henrik Solvay, Ravn's former supervisor. Still runs the magical security of the former corporation and has marked Ravn's file "unreliable, monitor whereabouts".

WHY YOU TAKE THIS JOB

For twelve years you drew barriers for people who never told you what lay behind them. Now, for once, you want to know what is behind a wall built this well. The nuyen pay for Vesna's library. The curiosity you pay yourself.

Hermetics, astral space and dragons.

Awakened mages follow traditions: hermetics treat magic as a science of formulas and circles, shamans as a relationship with spirits and mentors. Astral space is the second layer of the world, where thoughts have colors and barriers stand like walls. At the very top stand the Great Dragons: ancient, unimaginably rich, seated on corporate boards. Some walls were not built for people.
