Hacker

digital spy and virtual weapon

Guest list, cameras, elevators, drones: anything with a network is your door. You see the building as a data flow and find the spot where it stalls.

METATYPE · ZWERG

Thermal Senses. Your senses detect nearby thermal signatures that are normally invisible.

Fun-sized. You are not fast at light load, but you remain inconspicuous at normal load. People underestimate you, and your stature.

Tenacious. You do not suffer a harm penalty until an entire row is filled.

Thiccblood. Alcohol does not linger. Resisting poison or disease costs only 1 edge.

IMPLANTS & BODY

Datajack at the left temple, cybereyes with image link and low-light amplifier. Your cyberdeck "Kessel" is soldered together from three corporate commlinks and carries a pendant from your sister.

FRIEND

Glitch, former building-automation spider. Maintained the elevator controls of the Meridian Spire as a subcontractor. Knows the building-control node in the garage, the maintenance schedule of the facade gondola and the rule that the freight elevator does not stop at 110.

RIVAL

Nullpunkt, Matrix competition. Sells the same exploits to the same people, just an hour earlier. Claims Kessel's cyberdeck is "a toaster with ambitions".

WHY YOU TAKE THIS JOB

The clinic in Puyallup keeps sending reminders. Six nuyen clears the rest. And Glitch said something that will not let you go: "Level 110 has its own host. Nobody builds that for art."

The Matrix. The Matrix is everywhere: as augmented reality over the street, as virtual reality when you plug in via trodes or datajack. Corporations run hosts; their security hackers are called spiders. Break in and you risk biofeedback that injures the body. Deckers like Kessel build their tools from scrap because a legal cyberdeck costs more than an apartment in Bellevue.
