NAME

PRONOUNS

Rigger

technology, flying skill, control over every machine

Air route, facade gondola, skycab, drones in the shaft: where others look for a door, you see a flight corridor. You get the crew up and back down.

MENSCH · FEUERPROBE · RUNNERS IN THE SHADOWS

PROFILE

LOOK	Late thirties, sun-weathered, short hair, a flight jacket with the patches cut off. Control-rig jacks at the neck, always a tool belt at the hip.
HERITAGE	North America · Atlanta (CAS), drone missions for the UCAS Army, stuck in Seattle since
BACKGROUND	Military · reconnaissance and transport drones in the Desert Wars, dishonorably discharged after refusing an order
VICE	Stupor · cheap synth whisky at the hangar bar "Cap's" at Everett field, at night when the memories get loud
IDN (SIN)	Your real military SIN was set to "killed in action" when you left. For everyday life you carry a fake civilian SIN.
CONTACTS	Handy Friends

METATYPE · MENSCH

Mensch. No special traits. By the rules you may instead pick up to two free permutations. Talk it over with the GM or skip it.

IMPLANTS & BODY

A control rig in the neck that links you directly to drones and vehicles. When you "rig", your body slumps and breathes shallowly. Your left hand is a plain army-issue prosthesis.

FRIEND

"Cap" Okafor, tilt-rotor pilot. Flies freight routes over the Sound and is not afraid of a pass at 400 meters. She drops the crew above the roof or picks them up again at the east facade.

RIVAL

Dispatcher Vance, Seattle skycab control. Once caught Zephyr rerouting a skycab without clearance. He knows the control rig's signature and reports it with pleasure.

WHY YOU TAKE THIS JOB

You want your old reconnaissance drone back; a scrap dealer in Tacoma holds it for twelve nuyen. Six is a start. And this run has altitude, wind and a tower that deserves a proper approach.

Riggers, drones and corporate wars. A control rig links the nervous system directly to machines: whoever rigs feels the rotor like their own hand. Such implants cost Essence, a piece of humanity that cannot be bought back. The Desert Wars are the televised wars of the corporations, mercenaries fighting in front of cameras. Anyone who flew there knows the difference between a target and a person.
